

WORLDWIDE MEDICAL

REPATRIATION SERVICES

Air Ambulance • Stretcher Transport • Bed-to-Bed Transfer
Medical Escort • Full Coordination

From any point in the world to any destination.
Safe. Coordinated. Professional.

About Repatriation Antalya

Repatriation Antalya provides worldwide medical repatriation services for patients and injured individuals. We organize safe, reliable and fully coordinated transfers from any location on the globe to any destination — whether it is hospital-to-hospital, airport-to-hospital, or complete door-to-door medical transport.

Our experienced coordination team manages every detail: medical assessment, flight arrangements, visa and documentation support, ground ambulance connections, and continuous communication with families and receiving medical facilities. We are available 24/7 and coordinate every step with safety and care in mind.

Our Core Services

01 Air Ambulance

Air ambulance flights with full intensive-care equipment, arranged end to end. Ideal for critical patients requiring continuous medical monitoring, oxygen support, ventilation or specialized equipment during long-distance flights.

02 Stretcher Transport

Commercial flight stretcher service. The patient travels as a stretcher passenger on scheduled airline flights with medical escort. Cost-effective solution for stable patients who cannot sit upright.

03 Bed-to-Bed Transfer

Complete hospital-to-hospital transfer. Includes ground ambulance pickup from the discharging facility, all air transport arrangements, and delivery directly to the receiving hospital bed.

04 Medical Escort

Qualified doctor or nurse accompaniment throughout the entire journey. Continuous monitoring, medication management and immediate response capability from departure until safe handover.

05 Full Coordination

End-to-end management of the entire process: hospital discharge paperwork, visas & travel documents, airport handling, ground ambulances at both ends, and liaison with insurance or assistance companies.

Global Reach

We arrange medical transfers between any two points worldwide. Examples of routes we regularly handle:

Origin	Destination	Example
Germany	Egypt	Patient transfer Europe → Middle East
Egypt	United States	Long-haul intercontinental repatriation
Turkey	Netherlands	EU citizen returning home
Any country	Any country	Worldwide coverage, no geographic limits

How the Process Works

- 1 Initial Contact**
Share the patient's current location, destination and general medical condition. We respond rapidly with suitable options.
- 2 Medical Assessment**
Together with the treating doctors, we review the medical reports and plan the safest transport method (air ambulance vs. stretcher).
- 3 Proposal & Quotation**
You receive a clear, detailed quotation including aircraft/flight options, medical team on board, ground transport and all coordination.
- 4 Documentation & Visas**
We assist with all required travel documents, medical certificates, visas and airline medical clearances.
- 5 Execution**
Ground ambulance pickup → airport handling → flight with medical escort → receiving ambulance → hospital handover.
- 6 Continuous Support**
Real-time updates to family and receiving facility until the patient is safely delivered bed-to-bed.

Why Choose Repatriation Antalya

- **Worldwide Coverage** — No geographic restrictions. We arrange transfers from and to any country.
- **Medical Care on Board** — Every transfer is accompanied by doctors or nurses experienced in aeromedical transport.
- **Full Transparency** — Clear quotations with no hidden costs. You know exactly what is included.
- **24/7 Coordination** — Our coordination team is available around the clock for urgent cases.
- **Insurance Friendly** — We work directly with assistance companies, insurers and hospitals.
- **Family Support** — Continuous communication so relatives always know the status of the transfer.

Request a Quotation

To receive the most suitable options and an approximate cost, please provide the following information:

1. Patient's current location

City / Country / Hospital name if known

2. Desired destination

City / Country / Receiving hospital

3. Patient's general medical condition

Stable / Critical / Oxygen requirement / Mobility status / Diagnosis summary

Once we receive these details, we will promptly prepare the most appropriate transport options together with a transparent cost estimate.
